

# READY TO BOOST PERFORMANCE?

## Discover a System for success.

### Turn your company into a high-performing organization.

Is your organization being held back by performance issues? Some are out of control. Do you know what they are—and how can they be remedied? What if you could identify which specific machine, process and area require immediate action? Better still, what if your operators and supervisors could see these issues and have the power to act on—and improve—the situation without delay?

The Visual Management & Control System (VMCS) from Competitive Business Solutions (CBS) can accelerate performance across your organization.

#### IMPROVE EVERY HOUR OF EVERY DAY.

Many organizations have clearly defined goals at the highest level. But the challenge is connecting the C-Suite with the shop floor. A VMCS helps you define, design and drive your strategic performance initiatives from top to bottom.

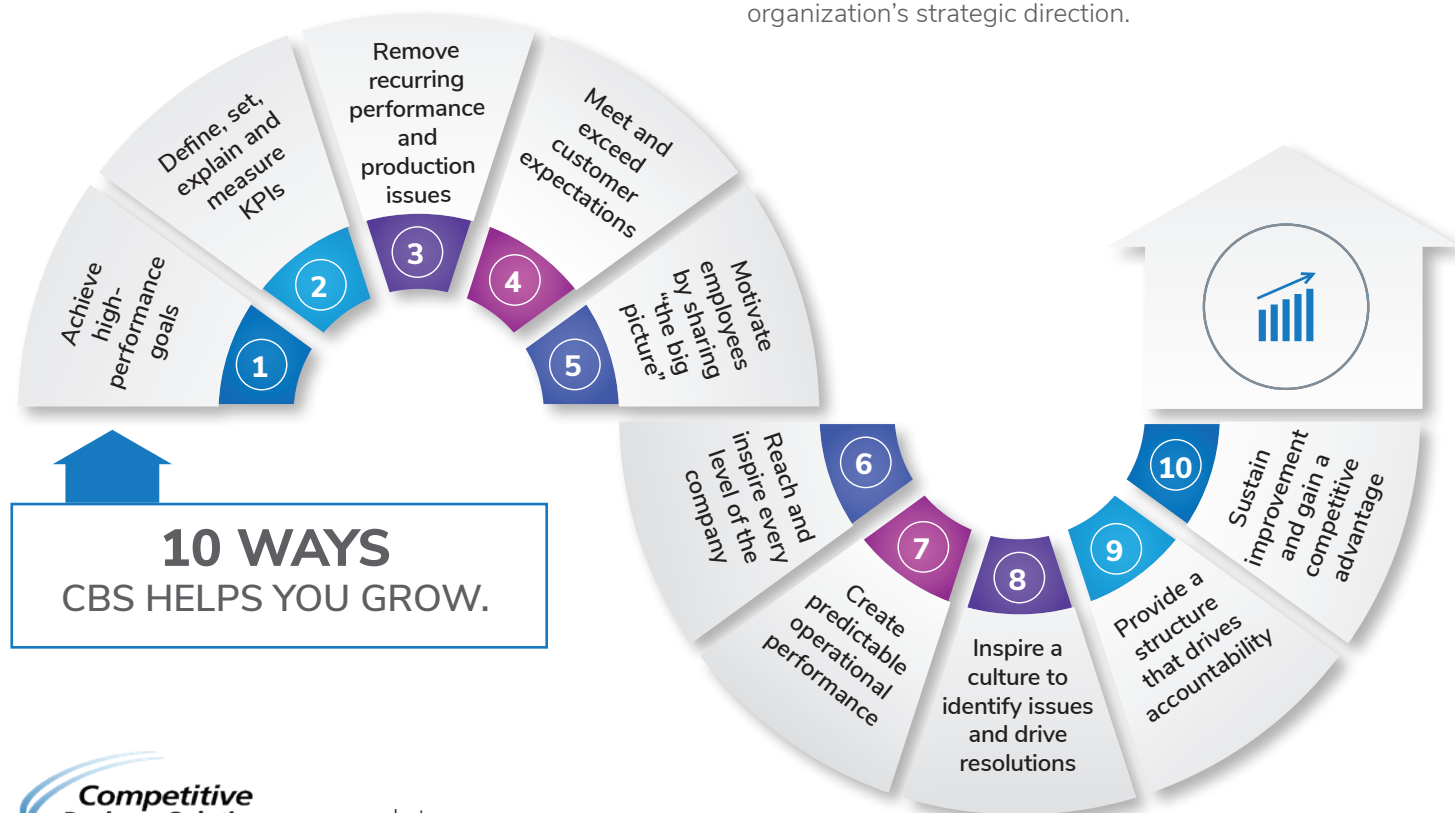

We can help you implement a process that enables you to track and improve daily management and other functional practices—even down to reaching an hourly goal. When you engage a system that tracks, manages and controls issues, you become empowered to take quick countermeasures. Your proactive responses can help you hit goals every day, week, month and year.

#### YOU HAVE GOALS. NOW GET EXPERTISE.

Let CBS help you hurdle strategic obstacles, support employee engagement and achieve quicker issue resolution and long-term performance improvements. We help leaders sustain progress and successfully realize their strategic initiatives.

#### SUCCESS HAS A SYSTEM.

The VMCS helps you enact policies, procedures and processes to drive improved actions and align with the organization's strategic direction.

## WHY CBS?

At CBS, we bring a collective century worth of experience in operational problem-solving, industry experience and creative thinking, as well as a collaborative approach. **You benefit from:**

### ▶ Saved Time

Our years of experience help companies hit the ground running, ready to quickly implement the VMCS templates and tools that allow your team to think about the how, not the what:

- Training materials and templates
- Site level alignment and visual boards
- Department level metric visual boards
- Cell level metric visual boards

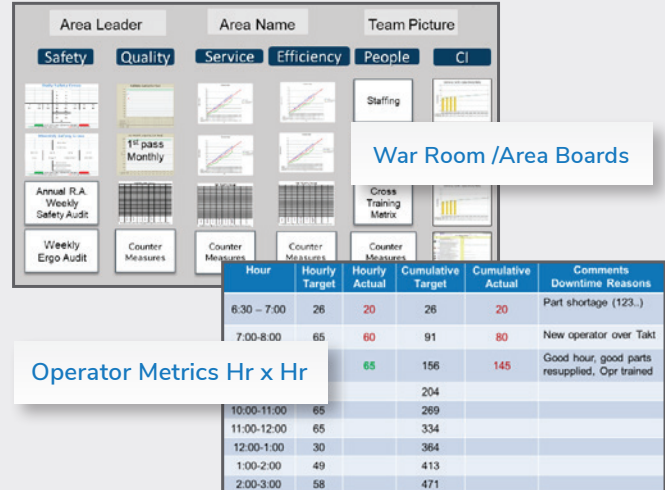

### ▶ Deep Experience

Our highly experienced team, with over 25 collective years of real-world manufacturing experience, helps coach teams through change which reduces the resistance of implementation.

Plus, with over a decade of experience partnering with companies like yours who have achieved success, we can predict common issues and help you think through how to fix them, and you get the reassurance that what you are doing is driving results.

### ▶ An Embedded Team

Expect our team to become partners with your team. We coach, teach and mentor you throughout the entire process, so you never have to go at it alone.

“ Implementing a tiered visual management system gives our team visibility into how to fix issues that can help us improve productivity, performance and efficiency. CBS helped us implement this system faster than we thought possible, allowing us to drive faster results. ”

**How can we help your organization defeat your competition?**
